System Requirements

- Maximum Speed 5 mph
- Tires must pass over the unit so that the tire is parallel to the teeth and not at an angle
- Warning Signs Required
- Locating & installing a Traffic Spike incorrectly or not using warning signs voids any warranty

1 Year Limited Warranty

- **Unrestricted Traffic in Free Direction**
- **Discourages Wrong Way Traffic**
- **In-Ground – Flush Mount to Road Surface**

Guardian's COBRA™ Traffic Spike System is designed and engineered to allow traffic to proceed freely in one direction only.

The COBRA™ System's main function is to prevent vehicles from proceeding through controlled entry locations by puncturing tires while allowing unrestricted passage from vehicles traveling in the allowable direction.

The COBRA™ Traffic Spike System provides extremely effective and economical one-way directional, unmanned traffic control. The COBRA™ product is manually activated and engineered with counter-balanced technology that provide a reliable and low maintenance operation.
