3/16 inch saw-cut TB-KIT
Preformed saw-cut installation kit

Saw-cut Template Block Kit (TB-KIT) is made to work with any sized BD Loops 3/16” preformed detection loop

The BD Loops TB-Kit uses the preformed loop you are installing as a template to chalk lines. As long as the saw-cut machine operator follows the chalk lines the saw-cut groove will be the exact size of the preformed loop being installed. Can also be used to mark where loops will be installed long before the project is scheduled or for hired saw-cutting crews to follow.
