

## Car Stops

Dependable and maintenance free!

Tough, recycled tire rubber is resistant to weather, salt, moisture, UV, oil, and temperature.

Made in the USA.

Prompt shipping. Will not warp, chip, or crack. Easy, one person installation (instructions included). Installation hardware is available.

SDI's answer to the growing demand for lightweight, durable, made in USA Car Stops! (Or Parking Curbs, Parking Bumpers, Wheel Stops or Parking Blocks.....or whatever name you prefer for them!)

Will not chip or crack like concrete. Nor warp like plastic can

## Sizes

- ST-6' 4 holes, 8 stripes, 40 lbs.
- ST-4' 3 holes, 4 stripes, 30 lbs.
- ST-3' 2 holes, 4 stripes, 20 lbs.

Permanent reflective striping - no painting!

Reflective stripes are made of road marking tape. Bonded stripes are available in yellow, white, blue or none

Ideal for parking lots, garages, wall protection, and other parking applications.

## Hardware

- 14" x ½" rebar spike and washer for asphalt installation of all products.
- 6" lag (screw, washer, and shield) for concrete installation of Car Stops.
- Use 10 ounces of adhesive for glue down applications and so hardware won't work loose with 4 or more trucks daily going over Speed Humps or Speed Bumps. Buy epoxy or adhesive locally (PL Premium Polyurethane Construction Adhesive works well!)
